By what means if i run this command in terminal? A: You are right, the project is a library, you have to install it like every other library (you can check here), doing so will link all the artifacts you have to the project and it will add the library to the application you are working on (in your case, you need to add a reference to the library in any of your current projects). You can just download and open the jar file to check if it doesn't have a file called.idea (it probably will, do this before download, it doesn't matter what file it has) and try to figure out how to use it. If you don't know what's is.idea, read about it here Hope it helped. Q: Convergence/divergence of  $\int_{-\pi}^{\pi} \frac{x^{(2019)}\{x^{(2019)}+1\}dx}{x^{(2019)}\log x}$  I have this question: Q. Show that the convergence or divergence of  $\int_{-\pi}^{\pi} \frac{x^{(2019)}\{x^{(2019)}+1\}dx}{x^{(2019)}\log x}$  I've tried using the integrals test, however, I can't seem to evaluate it. Can anyone help me solve this question? A: Rewrite as:  $\int_{-\pi}^{\pi} \frac{x^{(2019)}\{x^{(2019)}+1\}dx}{x^{(2019)}\log x}$  and change to  $-\frac{1}{x^{(2019)}}\log x$   $\int_{-\pi}^{\pi} \frac{x^{(2019)}\{x^{(2019)}+1\}dx}{x^{(2019)}\log x}$  Now use the fact that  $\int_{-\pi}^{\pi} \frac{x^{(2019)}\{x^{(2019)}+1\}dx}{x^{(2019)}\log x} = \int_{-\pi}^{\pi} \frac{x^{(2019)}\{x^{(2019)}+1\}dx}{x^{(2019)}\log x}$  for  $m \geq 1$ . This latter integral diverges. Thus, by the comparison test, the original integral diverges. Q: Fullwidth Video Background with Scrolling I'm trying to create a scrolling background video on a full width div using the CSS below.
